

## **Math/Science Meeting Notes**

**September 15, 2021**

- 1) Benchmark testing: move on to your lecture/lessons. Students should be done and just test those who are not over to the side of your class. Let's not make school boring for our students.
- 2) I'm not married to Encorestudent.com or Cyber High. You can use those as supplemental materials.
- 3) I have our approved grading percentages and will email those out asap. We have a meeting about grades on Friday as well.
- 4) Honors students. As long as their summer assignment is graded and entered into Aeries by the first quarter, we are good. If students need more time that is fine too. If you notice a student is not honors or AP material, please let myself and the counselors know. We want to ensure our students are successful.
- 5) We approved the IS contract today and will work out the new laws for IS/Distance learning as they were changed last week per the state.
- 6) For those moving from Cyber High to Edgenuity and have an hours course, check to see what topics merge over and you can eliminate those.
- 7) MR HASSEN!!!! THIS ONE'S FOR YOU!!! Do our teachers need a class agreement for their 0 and 9th periods as well?
