Term 1 Honor Roll

We're proud to announce the names of our Middle and High School scholars who made the Honor Roll for Term 1 (2021-2022 School Year)

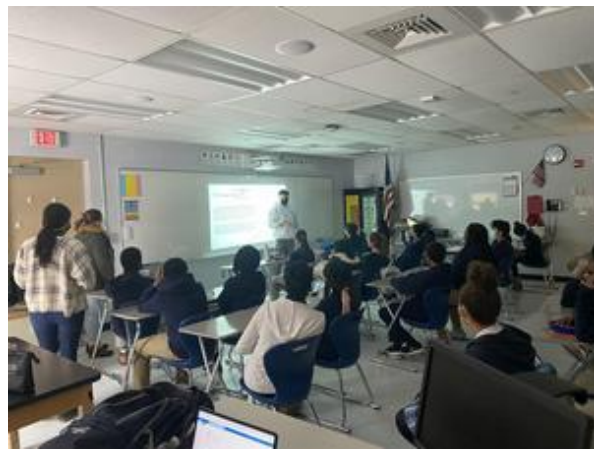

Congratulations to all on a job well done! *Enter to Learn, Exit to Lead!*

Formation of Our Middle School Student Council

FRCS is excited to announce our first Middle School Student Council!

This group consists of scholar representatives in grades 5-8 who will work to help be the voices of their grades. Student Council members will lead by example and will need to demonstrate strong leadership and exemplary citizenship. Scholars will demonstrate responsibility, respect, and safety. Student Council is an organization that represents Foxborough Regional Charter Middle School Students. Student Council members will participate in a variety of activities throughout the school year. Students will aid in event planning, fundraising, school spirit, and leadership opportunities.

Hands-On Learning

We've seen some incredible hands-on learning in action over the past few weeks!

Scholars in Ms. Bartucca's Grade 3 class recently wrapped up their unit about volcanoes. They had so much fun making their own volcanoes during class!

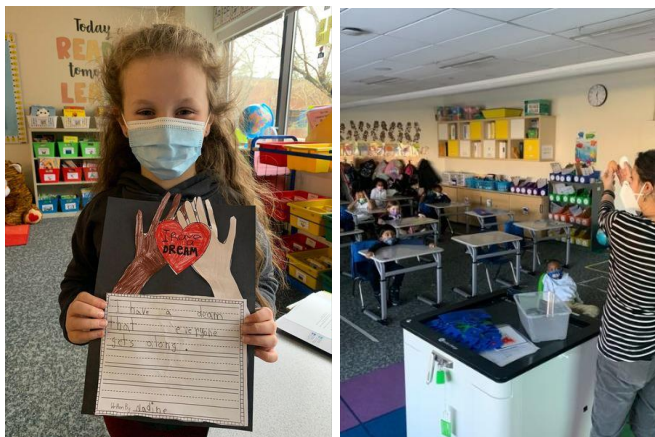

Learning About Dr. Martin Luther King, Jr.

This past month, our young scholars learned about Dr. Martin Luther King, Jr. They completed several activities that helped them understand his life, legacy, and message.

Scholars in Mrs. Arenella's Kindergarten class completed an egg activity. The scholars did an egg experiment, with one brown and one white egg. What did they learn? Both eggs are exactly the same on the inside - regardless of their outward appearance. This helped scholars understand MLK's message that all people should be treated equally; regardless of what they look like

Ms. McGrath's Grade 1 scholars spent some time in class today talking about Dr. King's "I Have a Dream" speech. Each scholar wrote a dream that they have and shared with their classmates.

Falcon Feather Program

In January, we introduced the Falcon Feather Program at our Middle School.

Scholars who are nominated by their teacher to earn a Falcon Feather demonstrate exceptional behavior and go above and beyond the typical scholar expectations. They are promoting positive school culture & community. These scholars recognize and acknowledge the strengths of others; frequently offer to help others and consistently promote inclusion, rather than exclusion of others.

Falcon Feather recipients will meet with Dr. Soria on Fridays during Flex Time to receive certificates and some of the scholars may win a raffle prize. Here are a few photos of our recent recipients.

Reverse College Fair

On Monday, January 10th, ten Foxborough Regional Charter School alum returned to campus in systemic leadership for our annual Reverse College Fair.

The fair, hosted by the High School Counseling Department is an opportunity for current juniors and seniors to ask questions and learn about the college experience, as well as other "life after high school" experiences in career, trade, and the military.

These incredible members of the FRCS family provided guidance and shared details of their journey and experiences to help our future grads look to the future.

Congratulations to our Science Fair Winners!

Congratulations to the winners of our annual Middle and High School science fairs! Our scholars presented their projects on Tuesday, January 24th. All of our scholars worked hard researching, forming questions, exploring their findings and analyzing data. Their participation in the science fair has benefitted them in ways that will help them succeed in other areas. Through their presentations, interviews, and hard work they have shown the ability to do independent work and put their minds and determination towards a goal.

High School Winners

1st Place Matthew Hayden: "Efficiency of Roller Coaster Launches"

2nd Place Camilla Royal: "Common Pollutants Turned Deadly"

3rd Place Akilan Dayasankar "Gaming the System: a Study on Card-Counting"

Middle School

1st Place 1st Place Mukilan Dayasankar: "The Key to Encryption: Is Bigger Better?"

2nd Place (T) Vansh Mookim & Richaa Voley: "The Detoxification Device"

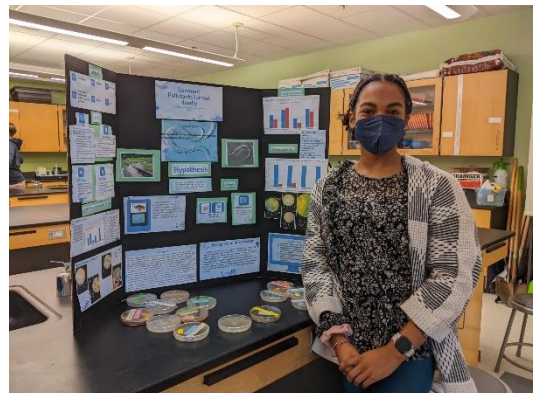

2nd Place (T) Jacklyn Omereokundaye: "Testing Water for Salt"

3rd Place Dhatri Daggubati & Sanjana Karlmarx "QR Cargo"

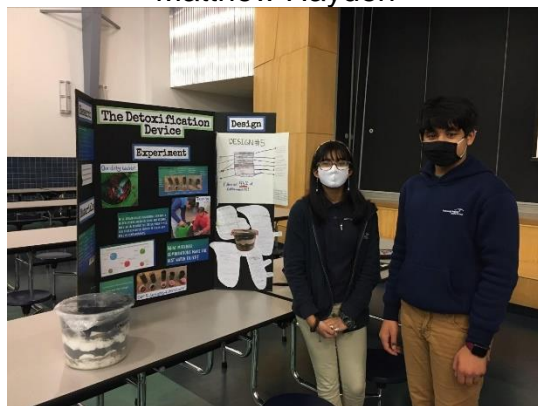

More than a dozen scholars will attend the Massachusetts Region III Science Fair which will be held virtually in March.
