**B. Presentation From the Floor on the Agenda**

None.

**III. School Site Updates:**

**A. ECHS Update**

*Facilities and Sustainability Manager Alayna Santos provided the following update about ECHS Facilities:*

**DSA project update:** Selected a vendor, Curtom-Dunsmuir. This vendor has experience with large-scale projects. Scheduled to begin work June 20 and set to complete work by July 10. DSA addenda was submitted in place of CCD and was approved several weeks ago. LESD approved this project to move forward last night, contingent on following through with DSA's directives.

Need to finalize the contract in AIA format. Committee member Jenina Ramirez asked about procuring proper template. CEO Alison Diaz responded that the proper template was procured and Curtom-Dunsmuir responded that they would send the contract in AIA format by end of day Wednesday, June 13. Urban Design Center committed to reviewing this contract by end of day Friday.

ECS is speaking with Urban Design Center about contracting their services to manage this project. Urban Design Center will review the architectural design.

Jenina Ramirez proposed creating a standardized ECS contract format (approved by legal) for facilities contracts to be used in lieu of the AIA contract format.

Committee member Anthony Jowid commented that previously his organization had gone the route of developing and using a proprietary contract format but because the AIA format is so widely used, his organization went back to using this format.

Guest Raul Ramirez commented that the AIA format doesn't have the specific language to optimally protect an organization from a liability and warranty standpoint. For this reason, a proprietary format is recommended.

Alayna Santos echoed that having a proprietary format would be beneficial for ECS' purposes.

**Action Item:** Committee members Ernie Levroney and Anthony Jowid stated that they would provide proprietary contract samples/templates to the Committee.

**Additional update:** Golden State Water still pending on whether they will move forward with fire hydrant project.

## **B. ECMSI Update**

*Facilities and Sustainability Manager Alayna Santos provided the following update about ECMS-I Facilities:*

For Prop 39, the lighting upgrades have been installed and are operational. Looking to see a reduction in electricity bills going forward. The solar panel installation is on hold due to the condition of the roof. ReGreen found a contractor who can install a "cool roof" at cost so that the solar panel installations can move forward.

For the pending property tax refunds, ECS reached out via email and will meet with the Head of Economic Development from the Office of Supervisor Mark Ridley-Thomas.

### C. ECMSG Update

*Facilities and Sustainability Manager Alayna Santos provided the following update about ECMS-G Facilities:*

Prop K project had been stalled but is now restarted. ECS hired a new landscape architect to redesign final Prop K work. This work is scheduled to be completed this summer. Good preliminary indications about this new architect as he is communicative and detail-oriented.

Note: did not address New Market Q4 2020 agenda sub-item, will table it for a later date.

### D. ECHS 2 Priorities

*CEO Alison Diaz provided the following update about ECHS 2:*

ECS has hired ECHS 2 Founding Principal Dave Trejo. He is sponsored by ECS for the Ryan Fellowship (part of the Accelerate Institute) which is a development program to prepare new founding principals. Dave Trejo will be in intensive training starting in July and will be charged with finding potential ECHS 2 site locations and driving the selection and procurement process forward.

Alison Diaz requested a working group within the committee agree on a criteria system to evaluate site locations using point allocations for each subcriteria. Alison Diaz showed an example of a site criteria system that was previously developed with the help of a consultant.

**Action Item:** Alison Diaz and Alayna Santos to create a draft criteria list and send it to the Committee for review.

Committee chair John Kim commented that greenlighting process from other charter networks typically involves analysis of competing high-performing charter and private schools and prospective student demographics in the local area. Past these standard steps, the process is highly variable based on other factors.

Raul Ramirez recommended a multi-level criteria system. Start with 3-5 points at the first level to narrow down sites, then go to other levels with more criteria.

**Action item:** Committee members Anthony Jowid and Ernie Levroney stated that he would share his organization's criteria list.

## **IV. Discussion Items**
