RE:	Summit Learning Platform Overview

Proposed Board Motion

This is an information item.

Introduction

- The Summit Learning Platform is a tool that helps teachers facilitate personalized learning in core courses.
- The platform helps students move at their own pace learning skill sets (soft skills) and apply skills to real-world projects.

Background

- Summit Learning Platform was brought to MSA Bell through a grant application for implementation in the 2016-17 school year.
- The platform has greatly been built out to focus on the following: learning through projects, mentorship for students, and equipping students with the skills and habits associated through self-directed learning. The platform has the ability to measure these 3 components within the platform. The ultimate goal is that these components will equip, empower, engage, and develop students to become emergent leaders of the 21st century.
