Re: MSA SC 15-16 Budget Expenditures

Question: Why did you need to overspend to exceed your budget for MSA-SC?
Many factors led to the overspending at Magnolia Science Academy-Santa Clara during the 2015-2016 school year as outlined below.

## Overview

The Santa Clara Unified School District ("SCUSD") did not renew the lease for the school facility at Central Park Elementary School where MSA SC was located for the previous three (3) years. The lease included onerous provisions including a nonrenewal clause and a waiver of Proposition 39 rights for a total of seven (7) years from lease inception.

Due to provisions within the executed lease, Magnolia did not file a request for Proposition 39 facilities for the 15-16 school year (by the deadline in November 2014), even though it is highly likely that the Prop. 39 waiver provision would have been deemed illegal by a court of law in the State of California, according to an analysis by YMC. This left MSA SC with very few facilities options.

## Enrollment Decrease

During the Spring 2015 semester, school administrators sent out intent to return forms to the families of existing students in order to understand how many students would be returning to the school in the upcoming 15-16 school year. Approximately 175 'yes' responses were received from the 484 students enrolled at the time. It was anticipated that at least that many students would enroll at MSA SC during the 15-16 school year at a new site.

## Timely Decisions

In June 2015 a facility was located at the National Hispanic University ("NHU"), which is located 13 miles from the former site in Santa Clara. The lease was negotiated with the Lessors and brought forward for a vote by the board of directors and execution by the Superintendent, Dr. Caprice Young.

The execution of the lease was delayed to pursue another possible facility option that was identified by ACCORD. This process prolonged the lease execution and the announcement of the new location to former students and families, with the result being that a significant number of students decided to enroll at other district and charter schools due to the protracted uncertainty. As a result the school started the 2015-2016 school year with 102 students.

## Expenditures

Staff:
In an effort to increase enrollment, the school hired a full time administrator to focus on recruitment as enrollment was below anticipated levels and far from the 250 students projected for the 16-17 school year. The school site also included a part-time administrator/part-time Spanish teacher familiar with the neighborhood and local community. The school administrators retained teachers and staff above the average staffing plan in order to keep strong and talented teachers with Magnolia. It was important to continue to have a strong educational program in order to attract students in future years in this new community. Some of this teacher overstaffing was made due to the requirement to provide the full A-G course loads to high school students. And, a parttime support person was hired to focus on collection of documents needed for prior year revenues.

## Outreach:

Outreach efforts in the Spring included open houses, door to door knocking, fliers, postcards and as well as a $\$ 25,000$ contract for outreach and publicity with a local firm, Milagro Advertising, that was covered by the home office budget, but has now been appropriately charged back to the school. There were very few students from the east San Jose community that enrolled at MSA SC during the 15-16 school year. Possible reasons include timing of recruitment efforts, an inability to develop relationships with community leaders and organizations, as well as other factors such as unfamiliarity with the Magnolia Public Schools program and brand. We also heard from parents that they were uncomfortable committing to send their students to a school without a long term facility. It also seems to be the case that, despite low test scores, residents prefer their traditional public schools. Nearby San Jose Leadership Public School also closed down this year due to a lack of enrollment

Health Insurance:
Additionally, overpayment of health insurance premiums in the amount of $\$ 78,676$ also affected the school's budget. As soon as the overpayment was identified, Caprice met with the C-team to form an action plan and assign specific duties to assure policies and procedures were put in place to assure compliance and negotiate return of the overpaid funds. Since then we have received a credit of $\$ 29,633$ and we continue to work to recover additional funds.

Busses:
In an effort to retain students from Santa Clara and surrounding communities the school provided buses from Santa Clara to the new school facility in east San Jose. The buses costs $\$ 118,000$ for the $15-16$ school year. The anticipated bump in enrollment did not happen, even with paid transportation.

Facilities:
Our lease included a location to accommodate 250 students, more than twice as many as we had. So, while our facilities expenses were not more than anticipated, they were expensive relative to the number of students we had. We had an opportunity to purchase
land just north of NHU; however, affording it would have required attracting 800+ students and taken 18 months for permitting and the build. It is possible this option could be resurrected, but the risks are significant.

## Conclusion

The above named factors combined to put MSA SC in the current budgetary situation. For a detailed accounting of the school's expenditures, please see Exhibit A, MSA SC unaudited financials, attached hereto.
