VI. Executive Director Report

A. ED Report

T. Castanza gave the following update:

- We have a lot of end-of-year events happening; 5th grade graduation adds another layer to this;
- Many of our 5th graders will be attending one of the 3 middle schools who are working with us in a dyslexic support program; We hosted the principals and leadership teams of those 3 middle schools and discussed which students will be entering their school, what their strengths are, and what are our students needs; the principals agreed to keep us involved; we will meet with the families of 5th graders on June 1st to walk them through the graduation experience.
- Many parents of graduating 5th graders are asking about school busing for middle school; the OPT regulations regarding eligibility for yellow school buses: 6th graders who live more than 1 mile from their middle school can receive either yellow school bus or MetroCard; students in grades 7-12 can receive MetroCard only. We have been working with the principals of the 3 middle schools so that they can help families of 6th graders with busing issues immediately after the roll-over to their middle schools. R. Kerr asked if there was a change in school bus eligibility recently because she remembers 7th and 8th graders were eligible for yellow

school buses if they lived far enough away from their schools. The OPT Transportation Liaison for Staten Island schools is Shenise Hendricks, 718-420-5644, SHendricks4@schools.nyc.gov

- Summer services for 5th graders graduating to middle school will be offered at the elementary school site as offered any other year.
- We are planning professional development training for staff this summer; the emphasis is on training our entire team needs; focusing on writing with full team writing revolution training; also focusing on classroom management and a 2-tiered approach and executive functioning; this is still in the planning stage and more information will be shared by June.
- We did a walk-through of our permanent siting location; we have confirmation that construction will begin in July on the classrooms; target completion date is mid-August; our staff returns on 08/21/23. He then gave the floor to C. Volpe to discuss academic data.

C. Volpe said that we received a Summer Boost Grant and are fully staffed. We are fully enrolled with a wait-list. We hired a site-coordinator for the summer program.

Our students took the NYS tests and it went well, the students had more stamina and there were very few questions that they weren't prepared for, some students felt that the tests were easy; we are looking forward to seeing their scores.

She then reviewed the data for:

- **Whole School Growth and Projections** in ELA and Math for Fall 2022-Winter 2023 and Winter 2023-Spring 2023 for each grade; Projections 54% in ELA and 53% in Math; Growth 67% in ELA and 79% in Math.
- **Grade Level Projections and Growth** in ELA and Math for Fall-to-Fall; Winter-to-Winter and Spring-to-Spring (by cohort of students). The data shows that students that have been at our school for at least 2 years make good progress. Students already performing above grade level, are projected to keep growing at that rate, yet we are not exposing them to material on that level - which results in these students being shown as not making projected growth. We are planning to implement more enrichment activities so that we can expose these students to higher level work. In addition to differentiating our students who are struggling, we have to meet the needs of our students who need enrichment.
- **ELA and Math Data** for each grade from Beginning-of-Year, Middle-of-Year and End-of-Year

R. Kerr asked how this data will be used to plan for next year; C. Volpe responded that this is all shared with teachers for next year and the data moves with the students from class to class. We share this data with middle schools for our 5th grade graduates.

T. Frey thanked E.D. and C. Volpe for their hospitality during her school visit today; she spoke about MTSS (Multi Tiered Support Systems) to teach students of different levels in the same classroom; teachers know what skills students should know from their previous grade, what they need to know in their current grade and what they will learn in the next

grade which follows; this method can be used to offer enrichment to students already performing above grade level. L. Gyimesi thanked T. Frey for the time and effort she is already giving to our school.
