**Anti-Racism Statement:** Alma del Mar strives to be an anti-racist institution. We seek to dismantle racist and white supremacist structures in pursuit of justice and racial equity. We will fight against racism when we encounter it both within and outside of our school community. **III. Academic Excellence**

**A. Accountability Report 2023**

J. Korn presented the 2023 accountability report and shared that academic performance has not returned to pre-pandemic data, but that we are seeing progress and positive trends.

## B. Q3 Academic Update

### Positives

- Reading growth for K-3 scholars continues to be a strength. This is the second quarter that scholars grew one reading level on average. This quarter had the highest average growth since we've been using this tool, originally adopted in January 2021.
- Ottiwell 5th-8th grade ELA data continues to be very strong, with 72% of scholars passing their exams. This is an increase from 65% in Quarter 2. This bodes well for MCAS performance in those classrooms. 3 of those 4 ELA teachers are returning next year.
- Early elementary math data also remains very strong, with 71% of K-3 scholars passing their math exams.
- **It continues to be true that teachers who stay at Alma the longest produce the best results, so our key strategy around talent remains the correct priority.**

### Areas for Improvement

- Middle School math data across the network continues to be our area of most significant concern. We have been working with Jamie Morrison to identify shifts to curriculum and instruction in Q4. These shifts will likely lead to some discrete curriculum redesign for next school year.
- Broadly, Douglass MS scholars perform lower than Ottiwell MS scholars across the board. This is likely due to several factors, including the different make-up of the student bodies (i.e. half of the Douglass MS scholars each year enter in 6th grade), the more novice teachers and leaders at that campus, and the more demanding schedule. We are continually considering programmatic shifts and supports to differentiate for this context.
- 3rd and 4th graders across the network are the scholars who experienced Kindergarten and 1st grade remotely. They continue to demonstrate significant gaps in reading and writing, which shows up in both their STEP and ELA interim data. We are seeing the most progress in their STEP data, but interim results continue to lag.

M. Bride remarked about the correlation between more experienced teachers and the results of their scholars, and the importance of retaining great teachers. She asked about how Alma salaries compare to the local district. T. DeLoach reported that a small gap remains, but we have made progress on closing that gap.

C. Bator noted that teacher salary and other efforts to retain teachers should be a priority with Alma's fundraising efforts.
