

## **K-5 Math Curriculum Adoption**

Three curriculums have been selected to be reviewed as potential new math curriculums for grades K-5. They are all currently highly rated or connected to a highly rated curriculum on [edreports](#). These include:

- [Ready Math](#)
- [Eureka Math<sup>2</sup>](#)
- [EnVision Math](#)

We have an adoption committee, which includes one member from each grade-level team. They will be reviewing and evaluating each curriculum. We currently have sample kits from all three curriculums and are in the process of distribution. The committee worked collaboratively to design a [rubric](#) to use in their evaluation. Some priorities include teacher support, varied instructional support, multilingual learners support and digital components. So far everyone is very enthusiastic about finding the curriculum that is the best fit for OPA's teachers and students.
