|-----------------------------------|--------------------------------------------|---|------|-------------|
| Option 3: Shock Pad or Drain Tile | SHOCK PAD/DRAIN TILE NOT APPLICABLE | - | \$ - | \$ - |
| Option 4: Gopher wire | No | - | \$ - | \$ - |
| Option 5: Weed Abatement | No | - | \$ - | \$ - |

PROPOSAL IS BASED UPON PRIVATE LABOR RATES / EXCLUDES PREVAILING WAGE RATES

Estimator Notes:

Proposal includes turn key install of side section next to play ground

ARTIFICIAL GRASS INSTALLATION METHODOLOGY:

* **Excavation** is typically 2" to 3" below finished grade on most installations. If project is already at the appropriate grade or this work is to be done by owner/others, this is reflected in above pricing.

* **Install Sub-Base** a Class II road base, crushed miscellaneous base or equivalent. On putting greens, the top 1" is decomposed granite.

* **Install Commercial grade geotextile fabric**

* **Basic Artificial Grass Installation** - Perimeter secured with 5" or 6", 40DD, 4GA bright common nails every 3" to 6". The field is secured with 5" or 6" nails every 2' to 3' on center. Seams secured with 5" or 6" nails every 6" along the seam or 6" tall, 1" wide flat head sod staples. Infilled with #16 grit silica sand @ 1 lb. per sq.ft. unless otherwise noted.

* **Premium Artificial Grass Installation** - Perimeter framed with bend-a-board, a 1.5" X 1.5" composite material that allows for securing the perimeter of your installation with a pneumatic staple gun. Perimeter secured with 1", 18GA galvanized staples, field is secured with 5" or 6" nails every 2' to 3' on center. Seams are secured with 12" wide non-woven seaming tape and Supreme Seam moisture cured seaming glue along with nails or staples. Infilled with 1 lb. per sq.ft of Premium Infill IF selected/indicated above.

* **Infill** – Typical installation is 1 lb. per sq.ft. for residential lawns or light traffic commercial area lawns. Putting Greens require infill to achieve the desired STIMP speed – typically 9 to 11 - and usually would require 1 to 1.5 lbs. per sq.ft. Putting Green installations, and commercial installations or for heavy traffic applications, the infill requirement may be adjusted based upon pile height, face weight, yarn Dtex and expected foot traffic. Your Estimator will advise you of any special needs.

* **Cleanup** – Removal of all job related debris and materials. Cut remnants can be provided upon request before we leave the jobsite; all unused materials are the property of Purchase Green and will be returned to our warehouse.

* **Warranty – Request a copy of our labor and material warranty prior to signing your installation contract.**
Residential Warranty with Basic Installation Method – 2 years labor, Limited Lifetime Warranty and Customer Loyalty

Residential warranty with Basic Installation Method - 5 years labor; Limited Lifetime warranty and Customer Loyalty Program for product.

Residential Warranty with Premium Installation Method - 8 year labor; Limited Lifetime Warranty and Customer Loyalty Program for product.

Commercial Warranty – 1 year labor; Limited Lifetime Warranty and Customer Loyalty Program for product.

****Ground Cover has a 3 year product warranty on residential installations and a 1 year warranty on commercial installations****

****MELTING CAUSED BY LOCALIZED HEATING FROM REFLECTIVE SURFACES WILL NOT BE COVERED BY WARRANTY. BE SURE TO REVIEW YOUR WARRANTY FOR SPECIFICS**KNOW WHAT IS COVERED****

****BE SURE TO REVIEW YOUR PRODUCT WARRANTY FOR YOUR PRORATION SCHEDULE****

* **Maintenance** –Request our Maintenance FAQ document. **Premium Installations** are provided with a Free Turf Broom at project completion.

WARRANTY EFFECTIVE ON PURCHASES MADE AFTER 3/1/2017
Purchase Green Limited Warranty: Rev 5. Mar 1st 2017

Purchase Green Limited Lifetime Warranty

Purchase Green carries products that utilize the highest quality materials and the latest manufacturing techniques in the production of artificial grass. Purchase Green warrants that if the artificial grass/putting green surface that it provides proves to be defective in materials or manufacturing workmanship resulting in premature wear during normal use of the product or suffers significant fade, breakdown or degradation due to exposure to natural ultraviolet rays within the same period, Purchase Green will at its sole option, either 1) repair or replace the affected area without charge to the Purchaser or 2) issue a credit equal to the cost of the replacement synthetic grass material for the area giving rise to the claim according to the following proration schedule:

Residential projects: Years 1-8 (100%); Years 9-12 (50%); Years 13-15 (25%); Years 16+ (15%)

Commercial projects: Years 1-8 (100%); Years 9-10 (50%); Years 11+ (15%)

In the event that Purchase Green elects to issue a credit in lieu of repair or replacement, said credit shall only apply to the affected area of synthetic grass giving rise to the claim. The credit shall be issued to the customer as a percentage off the replacement cost of a new synthetic grass of the same or comparable quality. The credit will be good only towards the purchase of Purchase Green synthetic grass directly from Purchase Green. There will be no cash payment.

If there is deemed to be a valid warranty claim AND the original product IS available, replacement product will be provided (in accordance with the above proration schedule) to cover the area giving rise to the claim however there is a very high probability there will be a dye lot variation. This is a normal condition and does not give rise to additional claims. The customer does have the option of simply receiving a credit in lieu of the replacement product to be applied against the purchase of another Purchase Green product.

If there is deemed to be a valid warranty claim AND the original product IS NO LONGER available the customer will receive a credit in accordance with the proration schedule to be applied against another Purchase Green product. The amount of the credit will be based upon the original purchase price.

All warranties deemed to be valid on purchases more than 12 years old would receive credits in accordance with the proration schedule and terms above. Replacement of product will not be considered.

Any credit issued that is applied against the purchase of new Purchase Green product(s) will be applied against the published retail price at the time of the purchase of replacement product. It can be used in conjunction with standard published promotions (such as volume discounts) but it can't be used in conjunction with any other promotional offers to include retail/hot buy promotions, contractor or stocking dealer discounts, clearance pricing, etc.

Warranty claims are limited to the original purchase price of materials furnished by Purchase Green and DO NOT include any labor costs associated with replacing an installed product. Purchase Green artificial grasses & artificial putting greens are guaranteed against defects as listed above subject to the below terms and conditions:

1. Customer must register their Limited Lifetime Warranty and Loyalty Program within 60 days of the original purchase date.
2. To register the customer must provide the following information:
 - a. Project owner / Warranty Owner first name and last name
 - b. Address of installation
 - c. Purchase Green product
 - d. Name of supplier (e.g. Purchase Green store, licensed installer, licensed retailer, etc.)
 - e. Original Invoice number of purchase from Purchase Green
 - f. Original Invoice date of purchase from Purchase Green
 - g. Name of Purchaser (may be the same as or different from the project owner)
 - h. Copy of receipt of original purchase if not purchased directly from Purchase Green (e.g. a copy of your receipt from the reseller/retailer or your installation agreement/contract)

1.This information comes from a Tencate/Thiolon Product Advisory April 2011 – their yarn is used in our Nature's Sod Advanced & Premier but the content is relevant for all artificial grasses. Tencate is one of the world's premier yarn extrusion companies

2.Purchase Green specifically manufactures its products with green (as opposed to black) backings to minimize heat absorption.

WARRANTY EFFECTIVE ON PURCHASES MADE AFTER 3/1/2017
Purchase Green Limited Warranty: Rev 5. Mar 1st 2017

- i. Who installed your Purchase Green product(s)?

If end-user did not purchase the product directly from Purchase Green but rather through a licensed installer or a licensed reseller of Purchase Green products be sure to obtain the above information from your installer/supplier as that information will be required to register for your Limited Lifetime Warranty & Loyalty Program.

3. This warranty is transferrable as long as the customer has a Warranty Transfer Certificate from Purchase Green.

The following are specifically covered against and within the scope of this warranty:

- UV degradation which for the purposes of this warranty shall be deemed to have occurred should the original tensile strength of the product decrease by more than 50%, the fiber thickness has decreased by more than 50% or the pile height has shrunk by more than 25%
- Stability of backings, yarns and Tuft Bind
- Products, which have been repaired or replaced by Purchase Green, shall have a remaining Warranty of the balance and according to the proration schedule of the original warranty period.

Exclusions include:

- Warranty does NOT cover **PG Ground Cover**. PG Ground cover comes with a standard, non-prorated 3 year warranty. Other terms and conditions apply.
- Warranty does not cover “**remnant**” sales – such sales made in-store or online and are specifically sold “as-is”. They are sold at significant discount because they come with NO WARRANTY.
- WARRANTY DOES NOT COVER ANY TYPE OF MATTING ON THIS PRODUCT, REGARDLESS OF THE CAUSE.
- Damages caused by improper cleaning agents, exposure to chemicals containing elements from the halogen group (such as chlorine, fluorine, bromine, iodine), herbicides, pesticides, chemical run-off from neighboring properties and topical applications with a PH less than five (5) or greater than nine (9)
- Artificial grass installations that do not have proper drainage
- Abuse and or misuse; Normal wear & tear.
- Damages caused by vehicular traffic
- Product that has been replaced, repaired, altered, or installed by any person other than a properly licensed and trained artificial grass installer. This warranty does not cover the installation of the artificial grass or any issues stemming from the installation. This warranty does not cover any damage resulting from repair or attempted repair by anyone other than Purchase Green or its authorized agents, retailers, subcontractors or installation partners.
- Damaged, directly or indirectly, by acts of vandalism, machinery, animals, fire, chemical spills, acts of God, excessive static or dynamic loads, faulty or improper subsurface preparation, or subsurface failure.
- Damage resulting from localized heating (most often caused by highly reflective surfaces such as energy efficient or reflective windows & glass doors and/or smooth white surfaces). In this scenario the reflected energy usually reaches the turf as a narrow band (10-25cm) of reflected heat and may reach temperatures in excess of the deformation point of most plastics used in the synthetic turf industry. This is something to be particularly aware of when installing artificial grass that faces south or east and that is exposed to sunlight between 11:30 am and 2:00 pm adjacent to highly reflective surfaces.
- The unrolled artificial grass/putting green roll should not be left uncovered in direct sunlight. This is particularly important for stocking dealers. The secondary backing may absorb heat and the temperature of the top layer may exceed 194 Degrees F resulting in severe localized, uneven shrinkage. A plastic wrapping must be used for outdoor storage of the roll or it should be stored in a shaded area when rolled up. As an example – the temperature inside the top layer of an artificial grass roll with black secondary coating left in the sun at 90 Degree ambient for 3 hours will be over 160 degree F. °
- Damaged caused by leaving any heat-absorbent material on the artificial grass during daylight hours such as clear or dark plastic sheeting, etc. These products absorb heat at a higher rate than the artificial grass and may cause localized shrinkage of the fibers as the temperature may exceed the artificial grass stabilization temperature.
- Slight color changes will occur over the lifetime of this artificial grass product and is not considered a warrantable issue.

Purchase Green commits to handling all warranty claims promptly and professionally conditional upon the purchaser's account being in good standing at the time of the claim. All claims by the purchaser made under the terms of this warranty must be made in writing prior to the expiration of the warranty period and within thirty (30) days of learning of the suspected failure/defect.

1.This information comes from a Tencate/Thiolon Product Advisory April 2011 – their yarn is used in our Nature's Sod Advanced & Premier but the content is relevant for all artificial grasses. Tencate is one of the world's premier yarn extrusion companies

2.Purchase Green specifically manufactures its products with green (as opposed to black) backings to minimize heat absorption.

Purchase Green Installation Warranty

This is a labor warranty provided by and for installations performed by Purchase Green and is provided to the original purchaser (“Owner”). The specific length of this warranty will be as indicated on your separate Installation Agreement or Installation Contract and will vary from one installation to the next depending upon your chosen artificial grass product, artificial grass infill, and selected installation method. This warranty specifically excludes any portion of work performed by others if such is a necessary component of an artificial grass installation (examples include excavation, sub-base preparation, backfill, etc. that may have been performed by the Owner or by other contractors hired by the Owner.)

The following are specifically covered against and within the scope of this warranty:

- Seams
- Sub-base preparation (when performed by Purchase Green and specifically excludes sub-base failures resulting from improper native soil compaction performed by others and/or a result of improper backfill and compaction in adjacent areas performed by others; examples include areas adjacent to recently installed/modified walls, pools, etc.)
- Finished edge of the perimeter
- Any labor associated with a product warranty claim during the **LABOR warranty period**. *In situations where the product warranty period extends beyond the labor warranty period any labor costs associated with a product warranty would be the responsibility of the Owner when outside of the labor warranty period.*
- In the event that a valid warranty claim is made and the original product is no longer available the customer will have the choice of replacing the **affected area** with a similar product or receive a credit equal to the cost of the repair of the affected area. In the event that Owner elects to receive a credit in lieu of repair or replacement, said credit shall apply to the affected area of the product giving rise to the claim. Minor color or die lot variations may exist between replacement product and the originally installed product and are not indicative of a defective product.
- This warranty is not transferrable and is extended only to the original purchaser of the product.

Exclusions include:

Init

- Abuse and or misuse; Normal wear & tear
- Product that has been replaced, repaired, altered, or installed by any person other than Purchase Green.
- Damaged, directly or indirectly, by acts of vandalism, machinery, animals, fire, chemical spills, acts of God, excessive static or dynamic loads, faulty or improper subsurface preparation (performed by others), subsurface failure (performed by others), or the use of unauthorized fluids or cleaning methods
- Damage resulting from localized heating (most often caused by highly reflective surfaces such as energy efficient or reflective windows & glass doors and/or smooth white surfaces such as white vinyl fences). In this scenario the reflected energy usually reaches the turf as a narrow band (10-25cm) of reflected heat and may reach temperatures in excess of the melting point of most plastics used in the synthetic turf industry. This is something to be particularly aware of when having artificial grass installed on the South or East side of the home and that is exposed to sunlight between 11:30 am and 2:00 pm. **We will look for this with you and attempt to point out any potential issues however ultimate burden and responsibility for this rests with the owner as they are the only ones that know when and what type of windows were installed.**
- Damaged caused by leaving any heat-absorbent material on the artificial grass during daylight hours such as clear or dark plastic sheeting, etc. These products absorb heat at a higher rate than the artificial grass and may cause localized shrinkage of the fibers as the temperature may exceed the artificial grass stabilization temperature.¹
- This warranty does not apply to damage resulting from failure to provide reasonable maintenance including failure to clean the product as necessary

Purchase Green commits to handling all warranty claims promptly and professionally conditional upon the purchaser's account being in good standing at the time of the claim. All claims by the purchaser made under the terms of this warranty must be made in writing prior to the expiration of the warranty.

Replacement of a product or component does not renew the warranty period or otherwise affected the original warranty or warranty period.

1. This information comes from a Tencate/Thiolon Product Advisory April 2011 – their yarn is used in our Nature's Sod Advanced & Premier but the content is relevant for all artificial grasses. Tencate is one of the world's premier yarn extrusion companies
