Dr. Anthony Cardillo- MEND Clinic

- ER Physician
- Responsible for COVID-19 reports to the public through a local news channel
- Vaccines are recommended for the public
  - Some ill outcomes
  - Usually, a vaccine takes many years

- Usually, a vaccine is developed by taking a part of the virus and placed in the body. Exposing our bodies to the viral particle so that our immune system can recognize it as foreign to make an immune response. Antibodies are created.
  - Pfizer & Moderna worked on new technology for vaccines.
    - Genetically material was taken. The spike features, protein, to translate into Rna. The Rna is taken into muscle cells and it codes it to translate it into our system.
    - Research shows that those who were vaccinated were protected from the impact of the vaccine. Decreasing death and hospitalization.
    - The risks of getting vaccinated are substantially less than getting the virus.
    - There will be adverse outcomes.
  - Johnson and Johnson
    - Followed the vaccine protocol
    - On pause to ensure that there are not a lot more cases
      - 6 out of 7million people had an adverse effect as a blood clot.
  - Dr. Cardillo recommends vaccines for all teachers.

Ms. Smith- How do we eloquently put a vaccine policy in place?

Dr. Marsh- 46% of our staff did not think it was appropriate for JJMS to have a mandatory vaccine policy while 82% of parents support vaccines for teachers.

Ms.Griego- Expressed a responsibility to her health and her choices. She expressed that a mandate is going beyond the boundaries. Willing to come back to campus without the vaccine.

Mr. Lambros- Expressed agreeing to not mandate the vaccine.

Ms. Smith- Tasked the JJMS admin team to check in with other schools and see what they are doing.
