F. Student Spotlight

Josh D is presenting his STEM group project. The year round STEM program is made up of 7th and 8th graders who are allowed to discover their love of learning through STEM projects. Josh's project was started on his interest in Minecraft and his love for Brevard Academy. Josh designed an entire Minecraft world built on a model of the school!

G. Staff Spotlight

Ms. Monk and Ms. Seefeldt share the school's mental health strategic plan for 2023-2024. In reflection from last year, there were roughly 126 students who were able to meet with a counselor 3 or more times. In small groups last year 187 students were served through this program and 22 families received backpack buddies- a program to assist families with non-perishable items. The mentor/mentee program is off to a great start with 92 middle schoolers who are paired with an elementary-age student to help start their day on the right foot. Ms. Monk and Ms. Seefeldt shared their year-long programming plan which outlines various programs and plans to be implemented with students throughout the year. These programs range from social-emotional programs to mentoring programs to high school readiness programming. It is worth noting that Brevard Academy exceeds the suggested student-to-counselor ratio and because of this the counseling team is able to extend its services to provide more meaningful programming and resources to students and families.

H. Opportunity for Public Comment

Angelica Vazquez wanted to share with the board the importance of potentially adding a high school. She and her daughter truly love Brevard Academy and it would be a benefit to the community to add high school grades.

III. Committee Reports

A. Finance

Paul Cooper has been working with CSP and a new program that allows for instant feedback and comparison between budgeted items and current expenses. Paul Cooper reviewed current expenses and end-of-month and end-of-year projections. The new CSP

program that the board is using provides a new end-of-year projection- believed to be a more accurate representation of projections.

Currently, the employee retention credit program has been suspended and the status of our request is currently unknown.

Paul Cooper has suggested due to a rise in expenses and a leveling off in income that a sub-committee be formed to evaluate potential new revenue sources to account for the rising expenses.

The audit produces no negative findings and will be looking for approval in the consent agenda items.

B. Governance and Policy

There will be three policies for approval during the consent agenda items.

The internet safety policy should be reviewed by all board members by the next meeting.

Ted Duncan reviews the Parent Bill of Rights with the Board and outlines all up-to-date compliance items with the Performance Framework Action Calendar.

C. Facilities

Jen Silva shares that the HVAC update will take place next month. Several trees have been removed and other landscaping improvements have been made to campus.

The facilities committee discussed where play areas will be moved when STEM building work begins. The suggestion is to site prep two locations in order to ensure viable options are present.

A new scoreboard for the gymnasium has been ordered and waiting for shipment. There is also additional discussion on other upgrades needed at the school.

D. Development

No updates.

E. Long Range Planning

With Joel Malefy's recent step down from the board, we will be looking to potentially add another board meeting.
