

Compass Charter Schools
Scholar Leadership Council 2021-22 Scholar Survey

What additional ways might Compass improve its resources and supports for scholars?

- I'm not sure.
- nothing
- not sure
- none
- IDK
- N/A
- Creating more counseling learning labs for those who need them
- Acknowledge every scholar that has perfect attendance in elementary and never missed a day of school
- I don't know
- Add IXL and MAP testing
- I don't know
- Make the process of turning in monthly work samples clearer and more efficient.
- Again I've made suggestions in the past. I feel like all Compass does is ask and never implement.
- More field trips for those of us who don't live near any of the planned trips.
- Nothing in Particular.
- Estoy muy contenta de todo el esfuerzo que hacen por ayudar a todos los estudiantes
- More hands on activity.
- I don't know
- Ask teachers, advisors, etc., not to speak negatively about Covid protocols or new legislation. They set a very negative tone for the new live instruction which was really sad because I started out excited. And being negative about masks and immunizations is really upsetting when we've had friends die of Covid. People can believe whatever they want but keep it out of the school environment. Just focus on making every learning opportunity a positive one.
- I think we need more understanding and communication
- By giving us more support in science and history classes because these subjects are a little bit harder to understand.
- Be clean on items we are allowed, and not allowed to purchase. This is cause for great stress when I talk to parents like myself attending this school in particular.
- Nothing. All is good!
- Have more scholars come to compass to help them
- Keep track of them
- Na
- I cannot think of any additional ways that Compass can support their scholars.
- Do not change EF in the middle of the school year or even the semester
- Have teachers check their emails more often, since sometimes it takes weeks for some to get back to me.

- Limit the number of times scholars are switched between STs per year. Standardize a transition plan for all scholars and families when a change is made to ensure the transition happens quickly and smoothly. Ensure STs holds a connection meeting specific to new expectations the families can expect prior to proceeding with connections meeting as normal.
- Check up on them every now and then and let them know your here for them no matter what with any and everything. Make sure they know all of the resources they have.
- Have more teaching on how to take exams faster and more efficient, state testing and edgenuity testing
- The best thing about Compass is they have every resource there is and that's why my kiddos love compass
- Make the meetings a little more welcoming. Like have some fun slides and be more engaging. I would say that the meetings have some more game time rather than just study and organizing discussions.
- More emotional mental support maybe
- More information on how to become scholar of the month, and what is avid? More resources and opportunities for gifted and talented scholars!
- More in-person vendors and in-person field trips for older scholars.
- I don't really believe that there is much available other than properly building up scholars and creating an environment where they can focus on finishing class work rather than focusing on the issues surrounding them.
- Provide some free access to audiobooks
- Better authentic interpersonal communication.
- First of all I don't like online class. And I prefer class in person
- quicker response from teachers
- I'm happy with our current experience.
- Maybe more emotional support.
- I think the system is already good.
- None, the program is perfect the way it is
- I would like more online programs and apps. I was sad that we didn't get CTC Math this year. I don't use many of the apps we received because they are for kindergarteners. I would like math or writing workshops.
- Reach out more.
- More communication with teachers.
- i miss my old EF, she talked to me respectfully, helped, and supported my interests in music production
- everything so far seems adequate
- Require all teachers to have an email address
- Better support and communication for State and other testing. State testing prep and earlier communication about what it entails.
- No improvements needed.
- More meetings
- More field trips for 7-10th graders that are NOT touring colleges.
- i dont know

- It's fine.
- More reward systems
- Can't think of anything. I think it is great already.
- I fell like less pressure on us students and ways to help students from their minds that can't consatrate well.
- ?
- idk
- Nothing
- Ways for people to share ideas with what works for them. We need lists and ideas that are quick and easy to review.
- N/a
- They support us just fine.
- Try to get more scholars in
- Additional food resources
- Education on the virus
- Provide online students with more school supplies besides just work books.
- None
- Faster and more efficient ordering and order approvals--OPS is a good program, but the time it takes from when my ST submits a request to when I actually receive the materials can be very long.
- Nothing.
- I can't think of anything.
- i don't know.
- nothing
- Don't know
- Free computers or lessons on how to effectively take exams and writing assignments
- nothing i can think of
- I think they have done a great job
- N/a
- Maybe having labs for the scholars so that they can hangout and get to know there class mates.
- ldk giving school laptops
- add my teachers to my gmail so that i can talk to all of them
- curriculum suggestions
- More vendors in our area
- mas dinero
- Having ALL of the teachers, including electives, have emails
- They are good.
- Better schools computers for the kids on the online program.
- More Zooms. I understand that there aren't many teachers and it would mean longer times for teachers to work, but Zooms are fun, engaging and Informative.
- More in-person field trips for older students and to have them interact with each other. Virtual field trips make me really sad and remind me that I am lonely.
