

## Intelligent Pooled Purchasing to Control Medical Costs

Large jointly pooled arrangements are proven alternatives in providing agencies leverage in the health care market, but not all pooled purchasing programs work to your advantage.

### Keep PACE and Narrow the Gap

PACE is an intelligent alternative designed to position California public agencies for health care in the 21st century. Governed by the agencies belonging to it in the emerging health care environment, PACE provides leadership in addressing the challenges.

- Contribution strategy encourages employees to become better consumers of their health care.
- Ease administrative burden with online enrollment and eligibility through Keenan's web-based BenefitBridge platform.
- Active participant Wellness resources help mitigate long term health care trends.
- PACE provides stability and leverage in the marketplace.
- A range of plans available to meet your needs and budget.
- Underwriting guidelines protect the risk pool for all member agencies.
- PACE helps you maintain control over your health benefits program – something you may lose through CalPERS or other group purchasing platforms.

For agencies currently on a stand-alone basis, or participating in a group purchase program with no member input, PACE is an attractive alternative.

### We invite you to learn more!

**For more information about PACE, please contact your local Keenan representative. We will provide you with details on participation requirements and the data needed to underwrite your coverage.**
